Art Unit: 3764

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

In view of the applicant's amendments and after further consideration of the invention, the claims as presented avoid the prior art of record. The prior art does not disclose an exercise apparatus comprising a support base for supporting a bicycle frame, having front and rear forks and a flexible transmission element, wherein the support base includes a magnetic field generation resistance unit, a uniquely constructed flywheel disposed between the rear forks and a tensioning device for selectively tensioning the transmission element. In particular, the flywheel comprises a circular body having a hub section with a centrally located bore for receiving an axle, and an outer peripheral flange that includes a plurality of removably attached non-magnetic conductive radial segments that are rotated in the magnetic field during exercise.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tam Nguyen whose telephone number is 571-272-4979. The examiner can normally be reached on M-F, 9-5.
